camperdowni. (Camperdown Weeping Elm)—		
4 year head	35.00	

We reserve the privilege of making an additional charge for trees of special grade or quality, personally selected by purchaser.

You probably know that "Good Shade" is very scarce and will continue to climb in price for a number of years. We have made extensive and costly plans for growing shade trees that will have a mass of fibrous roots, thereby insuring successful transplanting. Among the many unique and up-to-date nursery ideas, conceived by our Mr. G. S. Cole, is the new "digger." During the last two years we have been told many times that our trees were worth a great deal more than the average, because the trees grow and recover quickly from the effects of transplanting.
